

What Causes Autism?

These things don't make people autistic

parents who act like refrigerators
yes, there were people who really *believed* that!

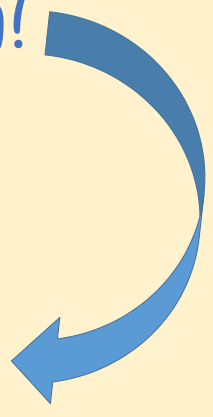

harmful kinds of food
food is actually *good* for you

toxins
whatever they are

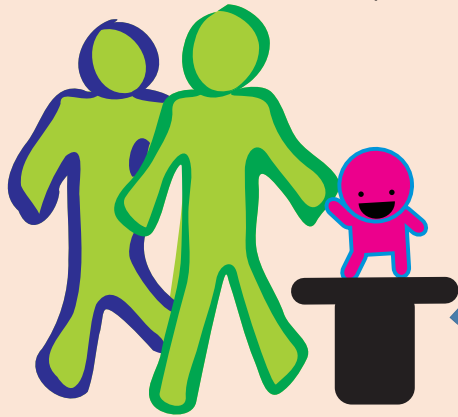

vaccines
you know, the stuff that saves lives?
really, *stop it* - there's nobody to blame

Here's the real "cause" of autism!

a loving couple

A loving couple that has a baby...

...a baby born with a special kind of brain

Remember

autistic kids are born, not made
it has always been this way
there is no epidemic

autistic kids come from love, not poison
autism is as natural as blue eyes or curly hair

autistic kids become autistic adults
autism is forever: welcome it. support it. don't try to cure it.
